# **SWIM CURRENT - MSC12**

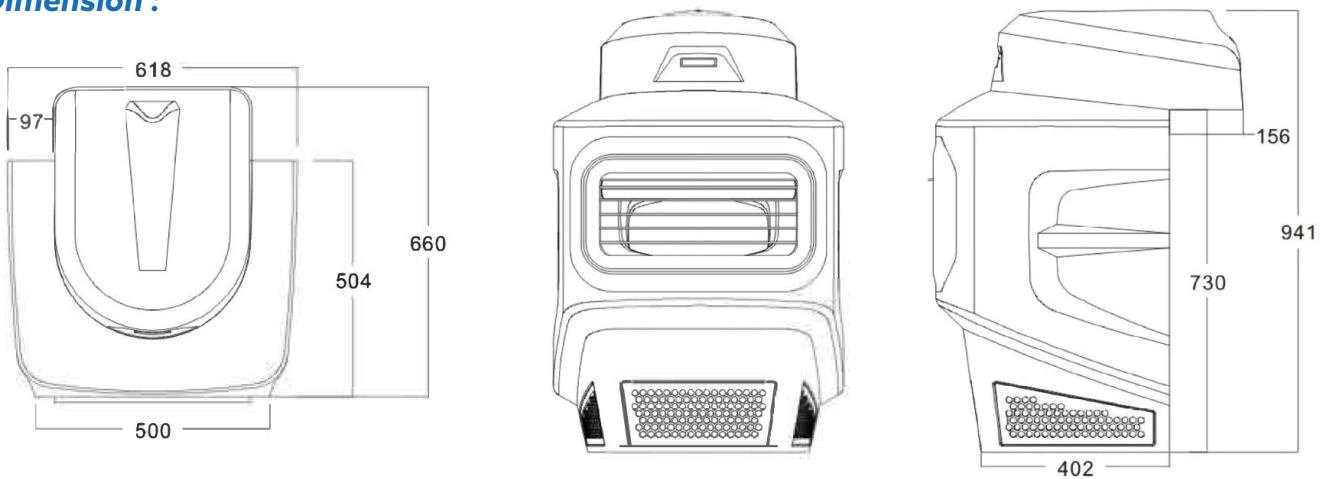

## Hydropool Portable Machine

Adopting a number of high-tech technologies in pool water treatment and spa projects, MAXER MSC Swim Current Machine is integrated the advanced and practical water environment equipment, making the construction of private swimming pools and faster, and making swimming and fitness experience more professional and perfect.

Learning how to swim is important, especially for children. Swimming can be a recreational activity, a sport, and also a life-saving skill. However, learning to swim can be a challenge, especially for children who don't have the basic skills.

A swim trainer is a tool that can help children and professionals swim more easily and safely. By using a swim trainer, professionals and children can focus more on practicing effective and safe swimming strokes.

### Dimension :

### Specifiacation

Model	Power Supply (V)	Working Voltage (kW)	Input Power (kW)	Rated Power (kW)	Laminar Outlet (mm)	Max Flow (m <sup>3</sup> /h)	Max Speed (m/min)	Dimension (mm)
MSC12	220V	DC36	2	1.2	460*215	719	150	660*618*941

### Main Features:

 Unlimited Swimming	 99-Speed Shift Mode	 Laminar Flow Technology	 Waterproof Remote Control
 DC36V Safe Voltage	 Wall Mounted Installation	 Fashion, Smart Compact	 High Quality Acrylic Shell
